### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1 - 23 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 - 23 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 23 as amended are rejected under 35 U.S.C. 103(a) as being unpatentable over Barthe et al or Flesch, in either case further in view of Ingebrigtsen et al..

If the former be viewed as falling short of anticipation e.g. under the argument that a glue glob may remain soft at a wetness barrier such as is the case with with certain plumbing sealants and therefore in which case the connecting member would lack a rigid portion at the seal, it would nonetheless have been obvious in view of Ingebrigtsen et al for a flex circuit connecting member 12 (to which the primary flex circuit connecting member 11 for this mechanical sector scanhead of the Barthe et al type connects) to connect to rigid pins 3A,3B of plug 3 which pins form part of that seal to the wet chamber. And insofar as it is not literally stated in the latter that there is a dry chamber beyond the plug (which is a reasonable assertion absent any further information since the fluid-filled scanhead is detachable) then it would have been further obvious in view of Flesch et al that this is the case, since the latter notes col. 4 lines 57 – 60 that the presence of an O-ring such as depicted on the perimeter of plug 3 in Ingebrigtsen et al would suggest a transition from a wet to dry chamber environment.

Art Unit: 3768

Additionally, since the claim 1 format for example is an open construct, i.e. 'comprising' one may read for 'single' - first -- and therefore in Ingebrigtsen there is at least a single rigid connector in terms of rigid seal 3 which seals the first chamber from the second, and flexible cable portions which would be connected to pins 3A etc, such that the former may comprise at least a single or a first such single connection rearward of the wet dry seal. Otherwise the arguments remain as set forth in the prior Office action. Dow et al US4049925 is cited as of general interest.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
